

Junior Warden's Report July 26, 2022

Nave Lights

Still in a holding pattern for all parts to arrive.

Parish Hall Storage

On hold until after the Diocesan Banquet.

Water Wall Control Box and Filters

Control Box had arrived but we don't want to run the system until we get the filter cartridges replaced.

Filter Cartridges - H2O no response to 3 emails or return phone calls. Blue Dot came out to see what we have. He said they would have to check on line but their cost would not be practical for us. They would have to add 30 % to the cost. Jim and I found a box of what we believed to be filters for the system. Our system needs 4 cartridges. Blue Dot believes three in the box are what we need. He suggested we check online or maybe Patio Pool and Fireside for what we still need, plus extras for future use. I was only able to find one on line. It happened to be one we have. I went to Patio, Pool & Fireside. They were able to find all of them through cross referencing the numbers from the ones we have. They, like Blue Dot, said they could order them for us but would have to add a charge to cover their cost. They gave me the web sites and the filter numbers they used so we could save by ordering them ourselves.

Jani has since ordered them.

Classroom #3

We had everything ready to move the Sunday school classes to Classroom 3 when I discovered the AC/Heater unit wasn't working. This unit is called a Mini – Split, a self-contained ductless heating and air conditioning system. We had Samco come out to repair it; they are actually the ones who installed it. They got it running but they said it is on its last legs and can't be replaced, this unit is obsolete and parts are basically nonexistent. They suggested we not spend any more money on it.

Sidewalks

Keating fixed the sidewalks.

Ovens and a Kitchen Inspection

Steve got the pilot light lit.

Keller was in on September 6 and conducted the required inspection of the Kitchen Fire Suppression system which included the Hoods and Fan. All is good. The inspector also commented on how clean and how much more organized the kitchen was from his last inspection. Accolades to Steve and his crew.

Respectfully submitted,

Mike Homan
