

**Junior Warden's Report**  
**November 29, 2022**

**\*Nave Lights**

Still waiting on the needed items. Supply and Demand still an issue all over the country.

**\*Water Wall Ceiling panel**

Bryan contacted the company who made the panel. They are to be out November 22<sup>nd</sup>.

**\*Courtyard, Sprinkler System, Grounds**

The brick work has been completed in the courtyard.

Sprinkler system not fixed yet.

Trees have been cleared around the SE corner near the Digital Sign.

Christie and Tony Wedeking patched and re-stained the benches in and near the courtyard.

Some work was done on the trees on the west side. I don't know who did it.

November 22<sup>nd</sup> I cleared the courtyard and adjacent sidewalk of leaves, trash and acorns for an upcoming funeral and a possible 2<sup>nd</sup> funeral coming up.

**\*The West Gate**

Davis Fence repaired it at no charge. As noted in my October report, this was a different issue from earlier this year when they were out.

**\*Lights in women's restroom in the back hall.**

I replaced the bulbs but that didn't fix the problem. We (Bryan and I) believe the ballast is bad. Bryan will be following up on that.

**\*No heat in the office and adjoining rooms and hall.**

The problem was a bad valve on the roof unit. Samco repaired it.

**Nursery**

There was a large easel with a combination white board/chalk board that was old, well used, and falling apart. Nickie asked that I remove it.

**Rector's Pantry**

I worked with Lisa on a new way to support the Rector's Pantry. A request was made by Deb Welch that we accept monetary donations from those who are unable to bring items in.

\*These are updates from October's report
